RISK MANAGEMENT POLICY

1. Background

Risk in literal terms can be defined as the effect of uncertainty on the objectives. Risk is measured in terms of consequences and likelihood. Risks can be internal and external and are inherent in all administrative and business activities. Every member of any organization continuously manages various types of risks. Formal and systematic approach to managing risks have evolved and they are now regarded as good management practice also called as Risk Management.

Risk Management is the identification, assessment and prioritization of risk followed by coordinated and economical application of resources to minimize, monitor, and control the portability and/or impact of uncertain events or to maximize the realization of opportunities. Risk management also provides a system for the setting of priorities when there are competing demands on limited resources

Effective risk management requires

A strategic focus,

Forward thinking and active approaches to management

Balance between the cost of managing risk and the anticipated benefits and

Contingency planning in the event that critical threats are realized.

In today's challenging and competitive environment, strategies for mitigating inherent risks in accomplishing the growth plans of the company are imperative. The common risks, inter-alia, are: Regulations, Competition, Business Risk, Return on investments, Business cycle, Increase in Price and Costs, Limited Resources, Retention of Talent etc.
